

PeopleU Sales Funnel Analysis Plan

Albertus Ariel Renara Pranata - RevoU Next Bellatrix - Team 4

**Identifying Funnel Drop-off Stages and High-potential Lead Segments to
Increase the Deal Won Rate**

Business Problem

PeopleU operates an 8-stage sales funnel from lead registration to deal won. Despite generating 3,397 leads over 2020–2022, only 26.5% successfully converted — leaving significant revenue potential untapped. Three core gaps are driving this underperformance:

01

Undetected Funnel Drop-offs

2 stage transitions fall below 80% conversion rate — yet the root causes and priority actions remain undefined

02

Sales Cycle Time Bottleneck

Avg. sales cycle is 30.6 days; the Offer Sent stage alone averages 6.6 days with no clear escalation process

03

Untargeted Lead Qualification

40.6% of drop-offs occur due to leads being unreachable, high-potential profiles are not yet prioritized upfront

Objective 1 • Funnel Drop-off Analysis

Identify the 2 lowest-performing stage transitions and raise their conversion rates from below 80% to at least 85%, contributing to an overall funnel conversion rate improvement from 26.5% to 30% within 6 months of intervention.

S

Specific

Measure all stage to stage conversion rates; flag the 2 transitions below the 82.8% average.

M

Measurable

Target: raise both flagged stages to $\geq 85\%$

A

Achievable

Root causes are documented — "Not Answered" (40.6%) and "Price Not Fit" (19.2%) — enabling focused, actionable interventions.

R

Relevant

Fixing the two critical stages directly adds more deals won without increasing lead acquisition cost at the top of the funnel.

T

Time-bound

Drop-off analysis delivered in Week 2; improvement action plan ready by Week 4; results measured at the 6-month mark.

Objective 2 · Lead Segmentation & Prioritization

Define the top 3 lead segments by conversion rate and reallocate at least 30% of sales capacity toward these high-potential profiles, targeting an overall conversion rate of $\geq 30\%$ (up from 26.5%) within the next 2 quarters.

S	Specific	Segment all leads by industry, traffic source (session_source), and company size; rank combinations by conversion rate to deal won.
M	Measurable	Target: best segment (Technology + Referral + Large) achieves 43.0% CR; overall funnel CR to reach $\geq 30\%$ through focused allocation.
A	Achievable	All required data exists across the leads, session_sources, industry, and funnels tables.
R	Relevant	Prioritizing high-converting segments increases deal volume without proportionally raising lead acquisition cost improving ROI per sales .
T	Time-bound	Segmentation analysis complete in Week 3; lead prioritization framework and reallocation recommendation delivered by end of Week 4.

Analysis Plan

Phase 1

Data Cleaning & EDA

- Data quality validation: null values, and duplicates.
- Lead volume distribution by year, industry, source & company size
- Baseline funnel metrics: total leads, overall CR, record counts per stage

Phase 2

Funnel Analysis

- Calculate stage-by-stage conversion rates across all transitions
- Identify highest-volume drop-off stages and documented root causes
- Time bottleneck analysis: average days spent per stage

Phase 3

Segmentation

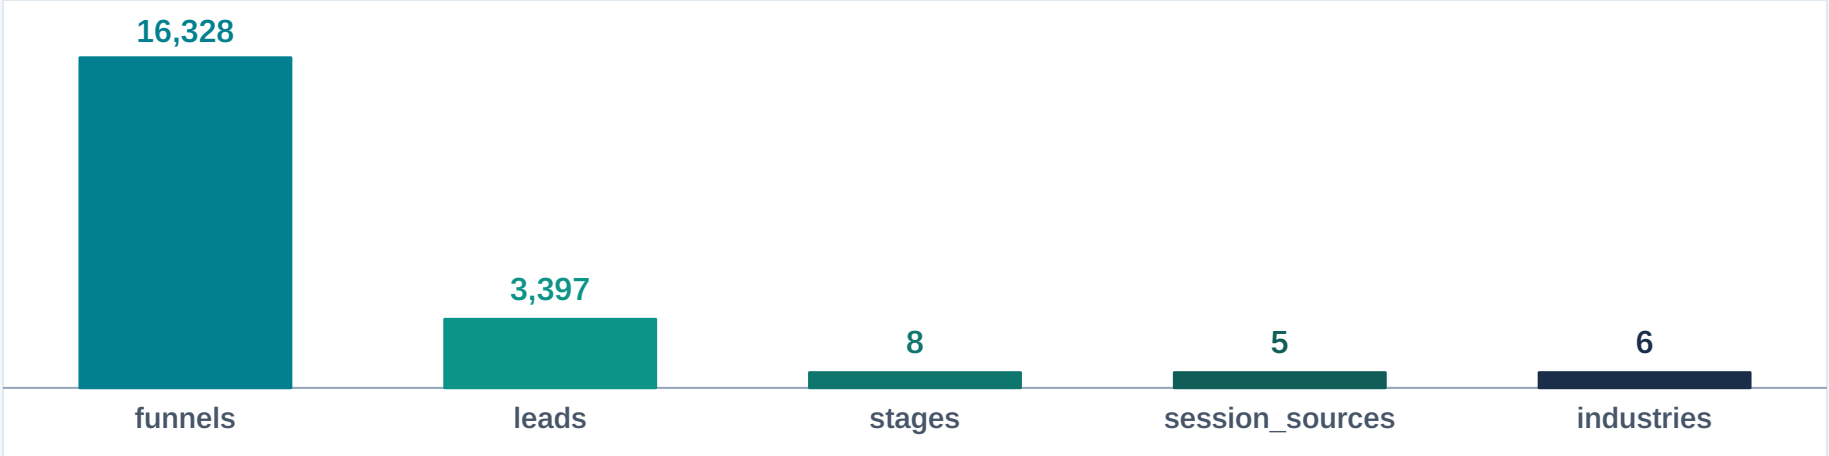

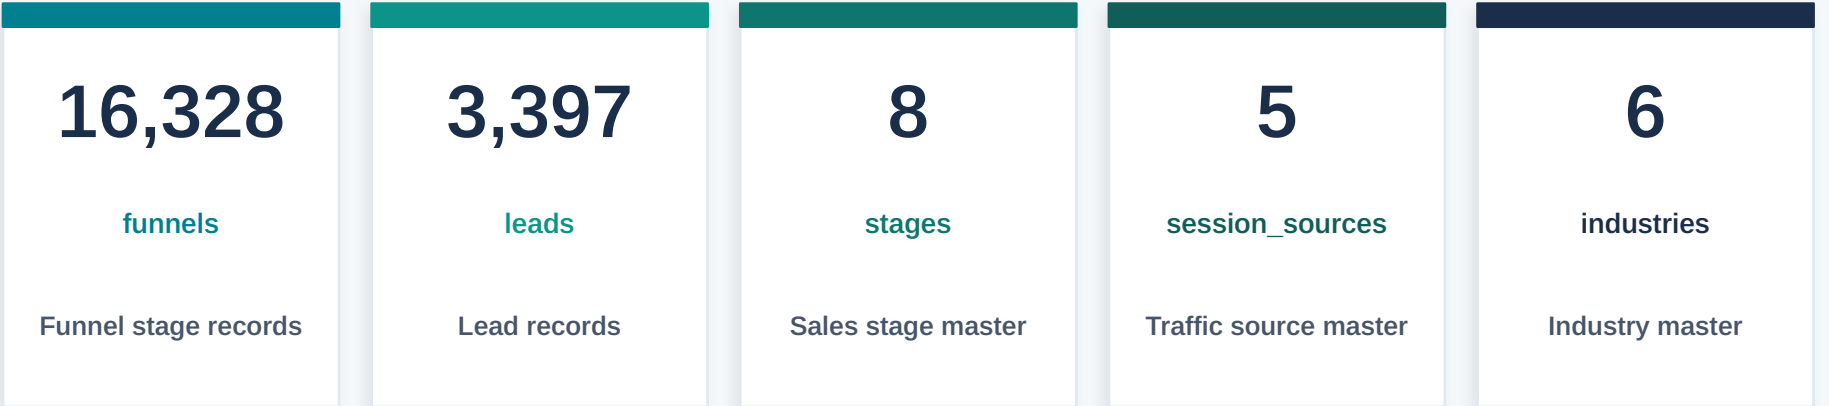

- Conversion rate by industry, session source & company size
- Identify top 3 highest-converting lead segment combinations
- Lead prioritization framework and sales team recommendations

PeopleU • B2B SaaS HR Platform

Exploratory Data Analysis

Data Overview — Row Count per Table

Data Quality Check — Null Values & Duplicates

All critical columns are complete with zero null values. No duplicate records detected across both tables.

leads table

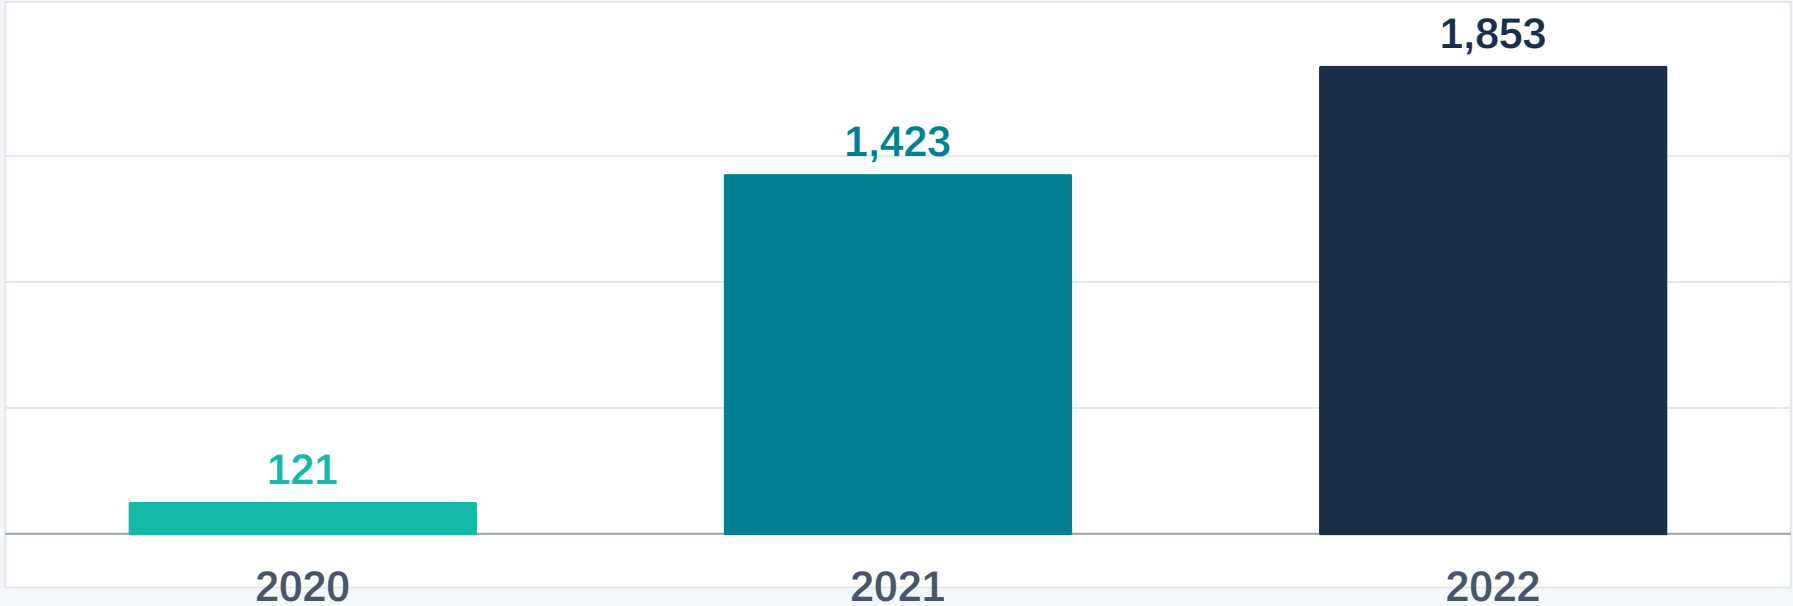

leads_id	0 nulls v
session_source_code	0 nulls v
industry_code	0 nulls v
leads_registered	0 nulls v
number_of_employee	0 nulls v

funnels table

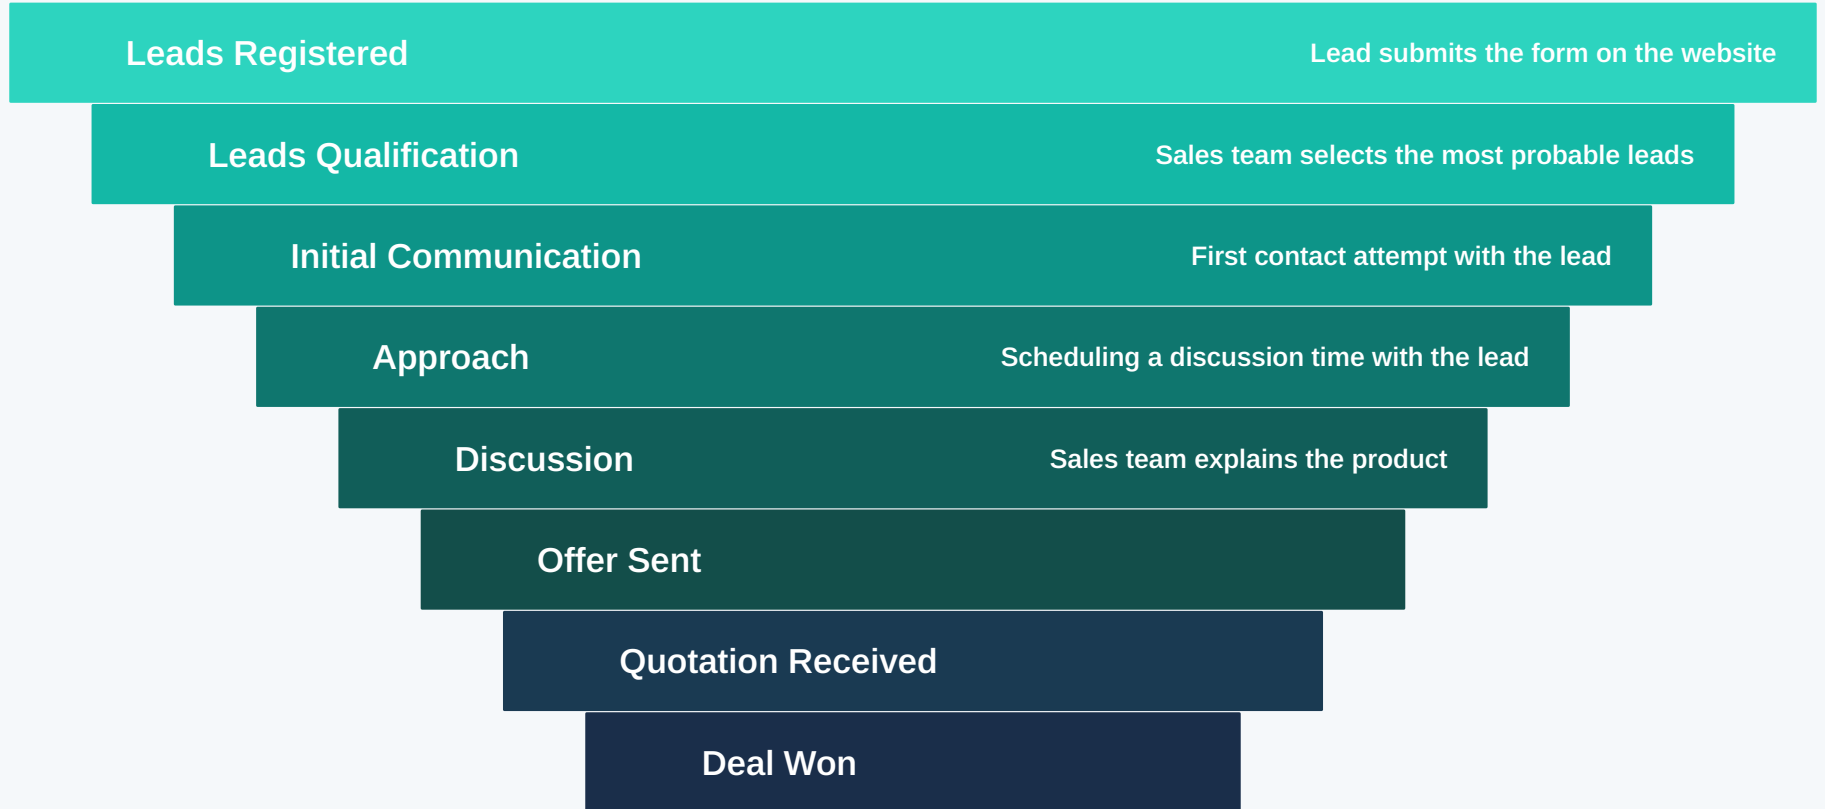

funnel_id	0 nulls v
leads_id	0 nulls v
stage_id	0 nulls v
TimeStamp	0 nulls v
reason	14,338 nulls !

** reason column: 1,990 records (12.2%) have a value and are used for drop-off reason analysis. Duplicate check: No duplicates found in funnels.*

Leads Distribution by Year (2020–2022)

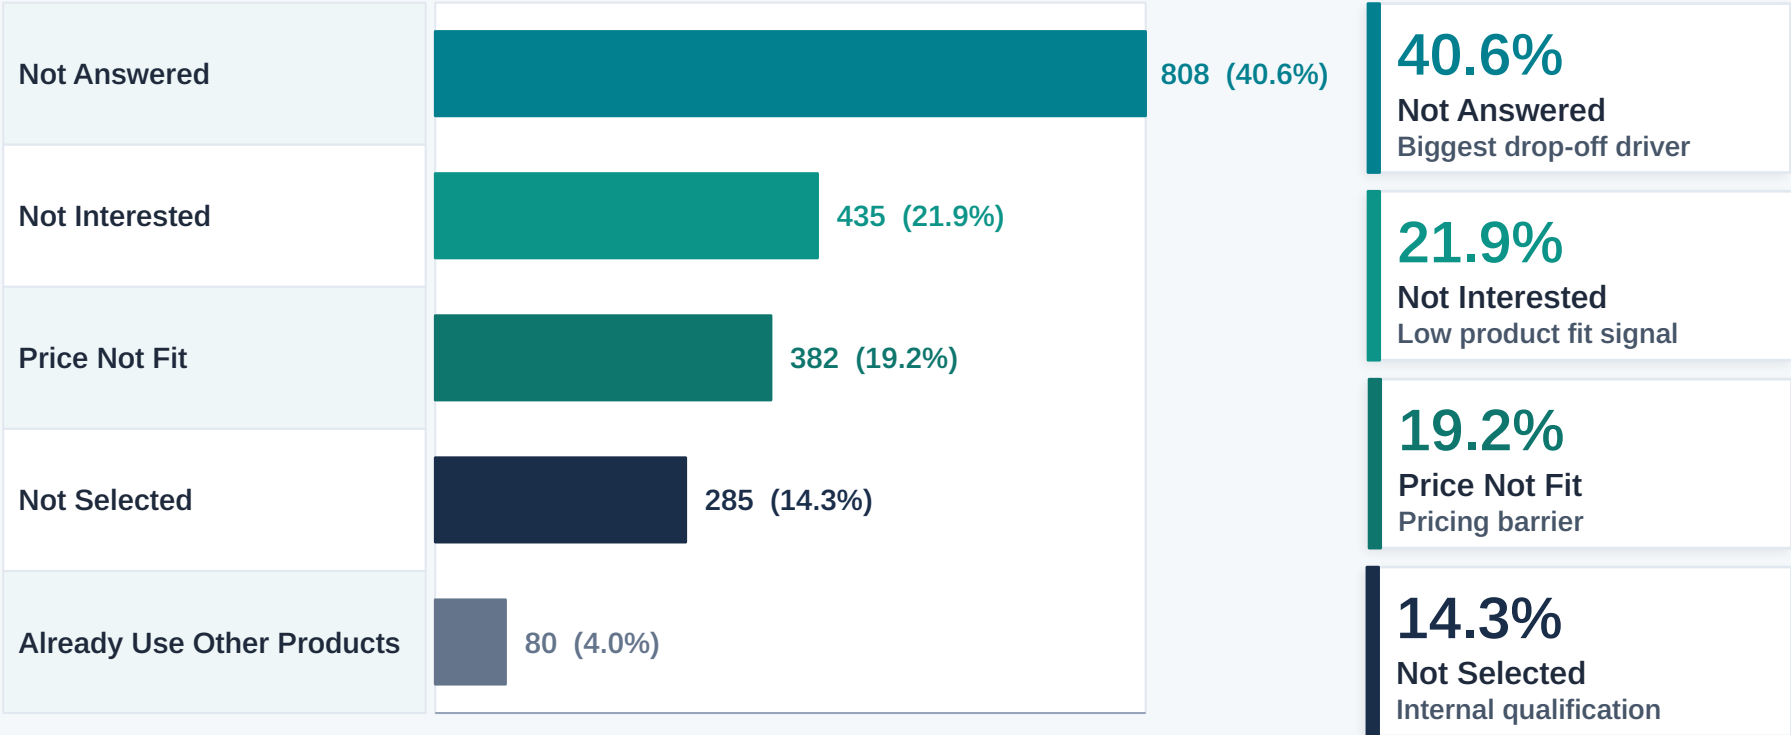

Sales Funnel — Complete Stage Overview

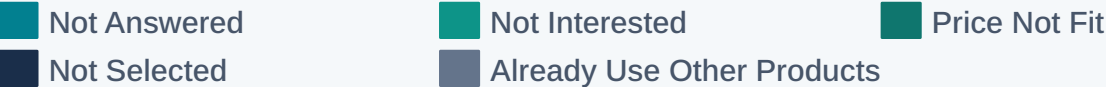

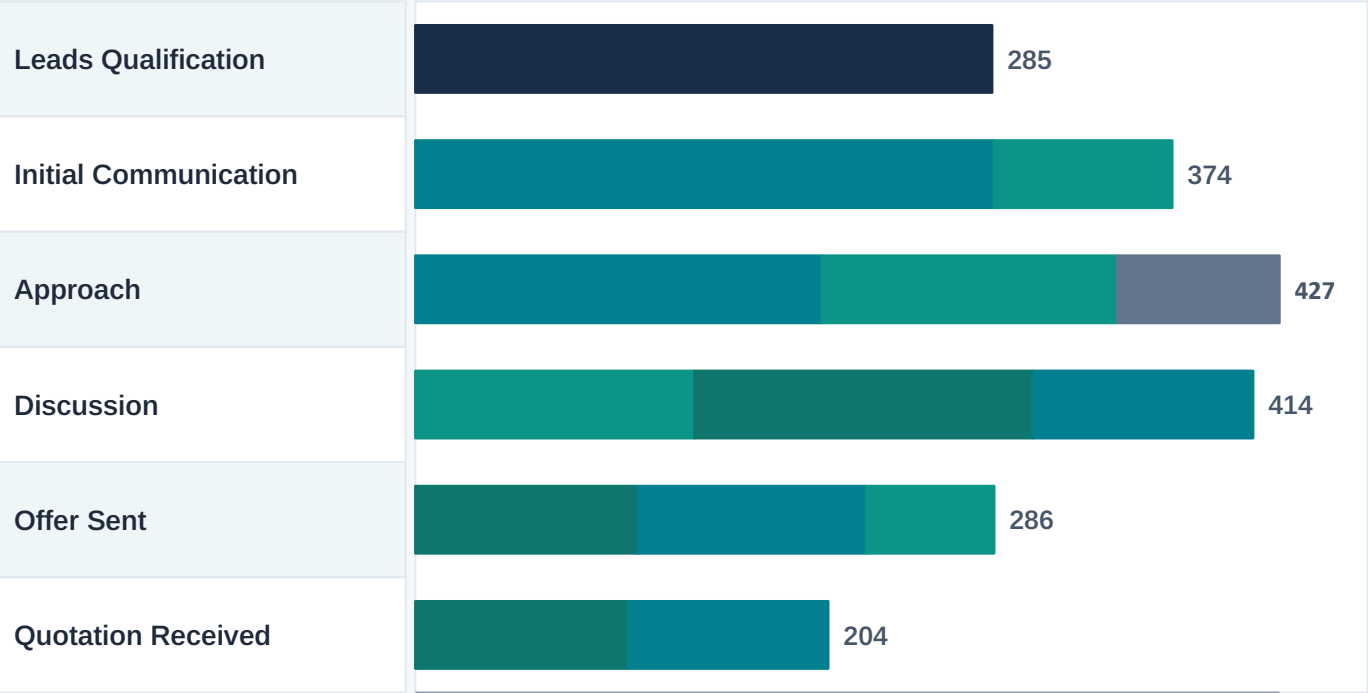

Drop-off Reasons — Overall Distribution

1,990 of 16,328 funnel records have a documented reason (12.2%). 5 distinct drop-off reasons identified.

Drop-off Reasons by Stage

Leads Qualification

285 leads filtered internally — not selected by team

Initial Communication

286 leads unreachable — not answered is dominant

Approach

427 total drop-offs — highest volume across all stages

Discussion onwards

Price sensitivity emerges and grows toward deal close

PeopleU · B2B SaaS HR Platform

Sales Funnel Analysis

Phase 2 • Funnel Performance Overview

26.5%

Overall Conversion Rate

901 of 3,397 leads reached deal won

30.6

Avg. Days to Close (Deal Won)

Range: 17 – 42 days | Median: 31

22.9%

Highest Drop-off Rate

Discussion → Offer Sent stage

Phase 2 • Stage-by-Stage Conversion Rates

Stage Transition	Bar = CR%	Avg 82.8%	CR%	vs Avg (82.8%)	Drop-off
Reg. → Qualification			85.1%	+2.3%	-506
Qual. → Initial Comm.			90.1%	+7.3%	-285
Comm. → Approach			85.6%	+2.8%	-374
Approach → Discussion			80.9%	-1.9%	-427
Discussion → Offer			77.1%	-5.7%	-414
Offer → Quotation			79.4%	-3.4%	-286
Quotation → Deal Won			81.5%	-1.3%	-204

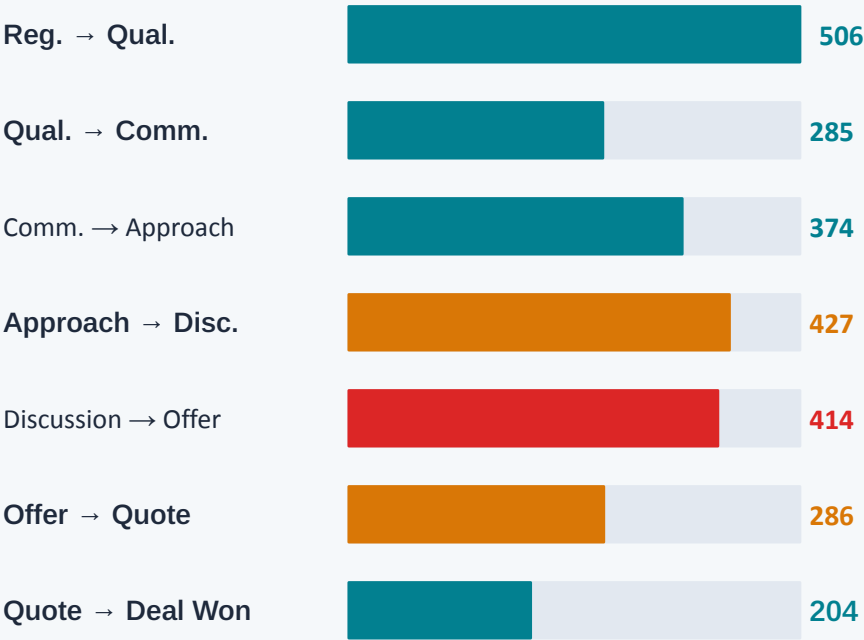

Above average (>83%)

Below average (80–83%)

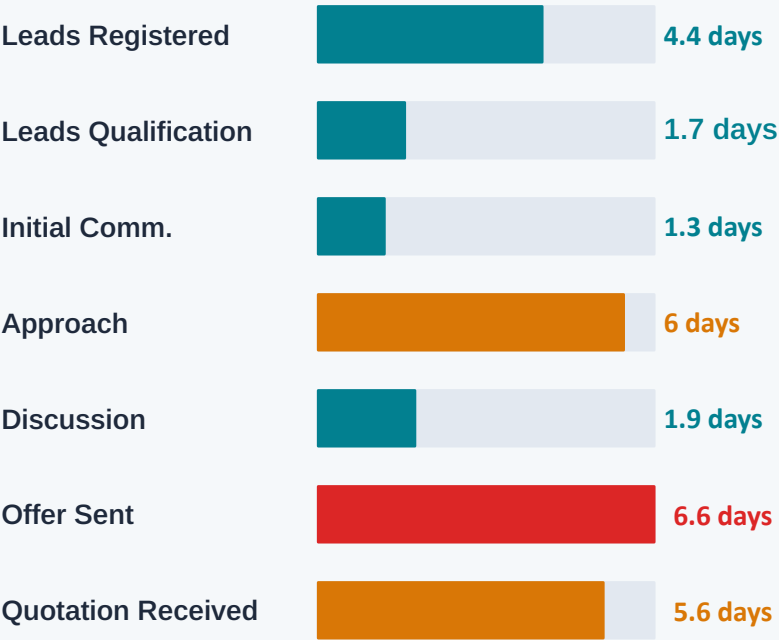

Critical (<80%)

Phase 2 • Drop-off Volume & Time Bottleneck by Stage

Leads Lost per Stage Transition

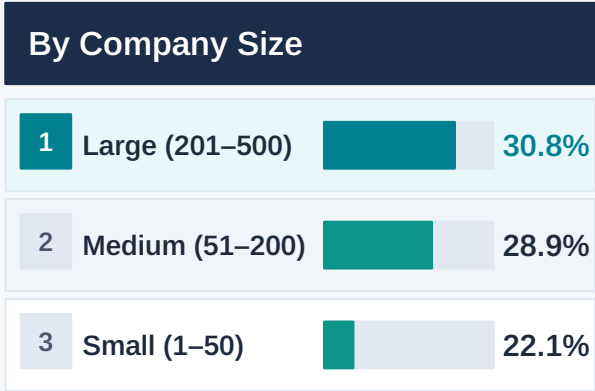

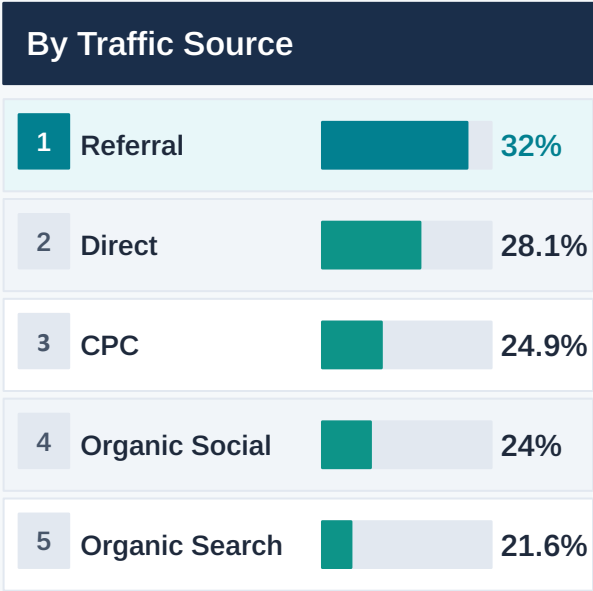

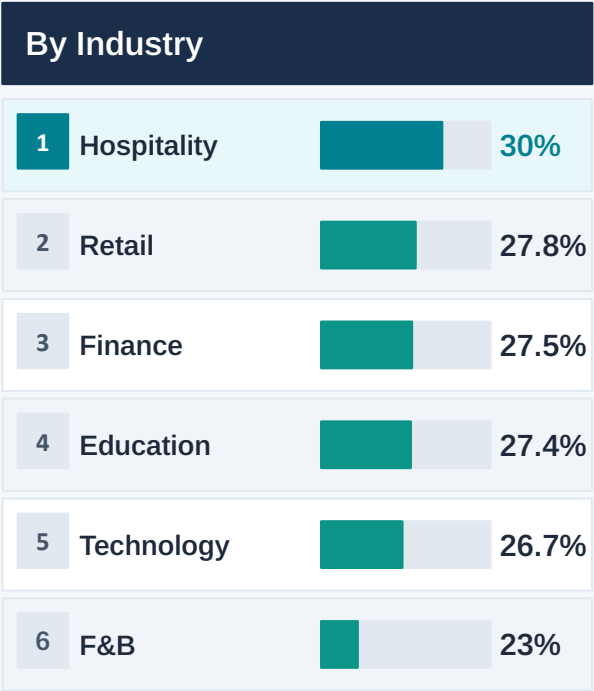

Avg. Days Spent per Stage

Bottleneck: Offer Sent stage takes longest at 6.6 days avg.

Phase 3 • Conversion Rate by Segment Dimension

Note: Conversion rate = leads that reached deal_won / total leads in that segment

Phase 3 • Top 3 High-Value Lead Segments

Segments ranked by conversion rate with minimum 10 leads sample. Referral is a consistent top-performer across all combinations.

#1 43.0%
Conversion Rate

Industry: Technology

Source: Referral

Size: Large (201–500 employees)

Volume: 79 leads | 34 deal won

Most statistically reliable — highest sample among top segments. Nearly 1.7x the overall average conversion rate.

#2 45.5%
Conversion Rate

Industry: Hospitality

Source: Referral

Size: Medium (51–200 employees)

Volume: 22 leads | 10 deal won

High conversion with a consistent Referral source. Hospitality is the top-performing industry overall at 30.0% CR.

#3 47.1%
Conversion Rate

Industry: Education

Source: Referral

Size: Large (201–500 employees)

Volume: 17 leads | 8 deal won

Highest CR in the dataset. Smaller sample — treat as directional signal. Referral + Large company pattern holds strong.

Recommendations & Strategic Priorities

01

Introduce Price Anchoring in Discussion Stage

HIGH PRIORITY

22.9% drop-off at Discussion → Offer — the worst stage in the funnel. 'Price not fit' is the leading reason from Discussion onwards (167 leads).

Action: Share a pricing range during Discussion before sending the formal offer. Introduce flexible subscription tiers for price-sensitive leads.

Expected: Target: lift Discussion → Offer CR from 77.1% to 82%+

02

Implement Structured Follow-up Protocol

HIGH PRIORITY

40.6% of all documented drop-offs are 'not answered'. Non-response peaks at Initial Comm. (286) and Approach (201 leads).

Action: Enforce a 3-attempt / 5-day multi-channel rule (call, WhatsApp, email). Auto-drop non-responders after threshold to protect bandwidth.

Expected: Target: recover response rate across early funnel stages

03

Build & Strengthen the Referral Channel

MEDIUM PRIORITY

Referral converts at 32.0% — highest of all sources, 10+ pts above Organic Search. All top 3 lead segments originate from Referral.

Action: Launch a referral incentive program for existing customers. During qualification, prioritize Referral leads from Technology + Large company.

Expected: Target: grow Referral share from 23% to 30%+ of total leads

04

Set Up a Funnel Monitoring Dashboard

LOW PRIORITY

No real-time visibility into stage-level conversion rates. Drop-off trends are currently only discoverable through periodic deep analysis.

Action: Build a monthly CR dashboard tracking conversion per stage and drop-off reasons. Set alerts when any stage CR falls below 75%.

Expected: Target: enable proactive intervention on emerging issues

Thanks!
